ZUMIC

Key Services.

Responsive Websites

We design cross platform websites optimized for major web-browsers and devices for maximum loading speed and performance. Only latest technology and best coding practices are used from website's inception and through to the launch.

Web Services (SaaS)

We develop web services of any level of complexity: log-in portals, social networks, e-commerce platforms, media applications, dashboards and browser games

Mobile Applications

We build native and cross-platform iOS and Android applications with unique interface features, synergy principles and hardware capabilities of each platform in mind.

Support and maintenance

We provide a dedicated team to handle any support or update issues (including QA, bug fixes, code optimisation and routine maintenance tasks) to our customers via monthly subscription model.

Our support service packages.
