Marian H.

PERSONAL PROFILE

I'm an software engineer with more than 10 years of experience.
I've got a master degree in telecommunications.
I started my career as a DB developer, then I switched to C++ and now I an python developer.
I enjoy being challenged with projects that require me to learn modern technologies and programming languages.
At last job I got a security master role. My responsibilities at this role were: finding vulnerabilities and securing a product, assessment of risks.
When I was working at Mirantis I becaome a core reviewer of Openstack. This role allows to approve and merge of changesets from other opensource contributors.
I have an experience of leading a small team(2 people).
I enjoy spending time with my family. Also I like hiking, fishing and playing chess.
