

Denys N.

Software Engineer

PERSONAL PROFILE

I consider myself a web developer also I like technologies related to web security and distributed systems. I am responsible, hard-working, confident and don't afraid of any challenges.

WORK EXPERIENCE

Company 1	Backend developer, DevOps
Company 2	Backend developer
Company 3	Web developer
Company 4	Web developer
Company 5	Backend developer, DevOps
Company 6	Backend developer, DevOps

LANGUAGES

Ukrainian - native
English - upper intermediate

SKILLS

React.js	C++	Docker	AWS
Redux.js	Go	Kubernetes	MySQL
C#	Python	Javascript (ES 8)	Mongo DB
Java	gRPC	Node.js	MSSQL
			GCP Datastore

EDUCATION

PROJECTS

Project name

Project 1

Description

Wing is a project that helps geophysicists to analyze the data about mining and automate the processes that had been implemented manually before. The app processes a lot of data and does a lot of computation to provide different metrics and the most convenient way for the user.

Technical stack

Python,Go,Angular,Pub/Sub,Datastore,Storage,Kubernetes Engine,GCP

Project name

Project 2

Description

Write backend
Write tests
Build microservice architecture
Set up communication in frontend
Architect database
Work with cloud providers like AWS and Azure
Review code of my colleagues
Setup deployment, remote servers, security fixes

Technical stack

Golang,gRPC,Docker,Kubernetes,AWS(Dynamo,S3,Cognito,and 15+ of others),Azure AD,Python,Tensorflow,Neo4j,React,D3

Project name

Project 3

Description

Write backend
Write bots
Deploy on Heroku
Set webhooks
Architect database

Technical stack

Angular,Node,Heroku,MongoDB,Telegram API,Viber API,CSS,Express.

Project name

Project 4

Description

Create design for this website
Build website using UX principles
Html/CSS/JS coding
Deploying website on host

Technical stack

Html,CSS,JS,JQuery,Owl.js,Bootstrap,Carousele.js,Font Awesome.

Project name

Project 5

Description

Create and implement backend architecture
Set up microservice orchestration using Kubernetes
Configure infrastructure on GCP

Technical stack

Golang,gRPC,Docker,Kubernetes,GCP,React,Redux.

Project name

Project 6

Description

Support current infrastructure
Develop new features
Refactor old code
Database design
Architecture design
Implement back-end part of project

Technical stack

Node.js,Express,Angular.js,MySQL,AWS
