

Dimitri J.

Back-end developer

PERSONAL PROFILE

As a software engineer I have more than 2 years of active working experience with Ruby on Rails and Postgresql.
During this time I also managed to improve my problem solving skills, collected knowledge about different technologies and I am still actively improving my abilities. This time I am looking for new challenges, opportunities to improve and also provide the team with my knowledge and experience.
As a team player I am result-oriented, responsible, fast and independent learner with great ability of team-work.
Love to help and give advice and also always happy to learn from others.
